### **900MHz Analog Wireless Transmitter**

ARG's 900MHz systems feature easy to select, Wi-Fi friendly frequencies with up to a 400 foot transmission range (Line of site). These systems provide additional flexibility for users to locate multiple interference-free channels, regardless of location or environment. Our 900MHz wireless transmitter (ARG-900AT) is durable, rack mountable, and easy to install and operate. ARG's 900MHz systems provide long lasting, robust performance at cost-conscious pricing and are compatible with all other manufacturer's 900MHz products.

#### **ARG-900AT Technical Specifications**

Dimensions:	1.92" H x 8.32" W x 5.00" D
Weight:	29.6 Oz excluding antenna
Color:	Black
Features:	Durable metal housing, rack mountable design Easy to install Compatible with all other manufacturers 900MHz products Diversified audio inputs (analog Line-in, digital coaxial, and digital optical) Low or no audio input notification
Display:	Green LCD Display
Frequency Range:	902.00MHz - 927.95MHz
Frequency Spacing:	50 KHz
Frequency Response:	50 Hz - 15 KHz
Audio Sampling:	Analog
Signal to Noise Ratio:	60 dB
Current Draw:	DC9V 200mA
Audio Input:	Analog Line-In, Digital coaxial and Digital optical
Transmission Method:	FM
Transmission Range:	400 Ft Line of Site
Warranty:	4 years parts
FCC Certification:	This device complies with Part 15 of the FCC rules. Operation is subject to 1) this device may not cause harmful interference and 2) this device must accept interference received, including interference that may cause undesired operation. FCC Regulations section 15.21 requires the user to comply with the rules of transmitter operation. Any changes or modifications made by the user not expressly approved for compliance may result in the loss of all privileges and authority to operate the equipment.
